Building for the future... today.

Telecom | Fiber Optics | Underground Electrical Services | Pipeline
Hydro Excavation | Directional Boring | Open Cut Trenching
Western Utility is a construction leader in the Midwest providing fiber optic, telecom, pipeline, underground electrical services and sewer/water services.

Western serves its customers with a team of over 200 well trained and dedicated employees. Western offers general contractors, local governments and telecom/data providers with full service, “end-to-end” installation and repair services throughout its service areas. Each of the company’s divisions — Fiber Optic/Telecom, Utilities (Sewer & Water, Electrical), Pipeline — offer 24/7 emergency response teams that currently serve many universities and places of higher education, municipalities and some of the top U.S. providers of telecom and data services.

Safety, timeliness and an acute commitment to customer service are the drivers to Western Utility’s success and its consistent high marks from its customers.

TELECOM
- Wired and wireless
- Aerial and underground cable systems
